

DynaMic

Very similar in capability to Mic-E, Techshot's EXPRESS Rack-based microscope, DynaMic is a highly-capable light microscopy system designed specifically for investigations aboard sub-orbital spaceflight vehicles.

Imaging is accomplished in a wide variety of highly capable and customizable modules placed over a novel illuminator-condenser with no moving parts, coupled to a high-resolution color digital single-lens reflex (DSLR) camera.

Provides an LED based Sub Stage Condenser Featuring:

- **Bright Field**
- **Dark Field**
- **Phase 1 Contrast**
- **Phase 2 Contrast**
- **Fluorescence**
